**AlGaInP Visible Laser Diode**  ADL-65074TR

★650nm 7mW 85 °C

*High Temperature, Reliable Operation!*

**Features**
1. High temperature operation
2. Higher power
3. High reliability

**Applications**
1. Automobile DVD
2. Bar code readers
3. High reliability laser instrument

**Absolute maximum ratings**

**Precautions**
1. Do not operate the device above maximum ratings. Doing so may cause unexpected and permanent damage to the device.
2. Take precautions to avoid electrostatic discharge and/or momentary power spikes. A change in the characteristics of the laser or premature failure may result.
3. Proper heat sinking of the device assures stability and lifetime. Always ensure that maximum operating temperatures are not exceeded.
4. Observing visible or invisible laser beams with the human eye directly, or indirectly, can cause permanent damage. Use a camera to observe the laser.
5. No laser device should be used in any application or situation where life or property is at risk in event of device failure.
6. Specifications are subject to change without notice. Ensure that you have the latest specification by contacting us prior to purchase or use of the product.
